Product	Category	Price	Quantity
Pen	Stationery	10	5
Notebook	Stationery	50	12
Coke	Beverage	20	3
Chips	Snacks	30	2
Water	Beverage	15	8
Chocolate	Snacks	45	6
Marker	Stationery	25	15
Juice	Beverage	35	4
Biscuits	Snacks	12	10
Eraser	Stationery	5	20

Task 1. Find the price of "Chocolate".

Task 2. Find which product costs ₹35.

Task 3. Find the category of "Chips" (but return "Unknown" if not found).

Task 4. Find the price of "Marker" using INDEX + MATCH.

Task 5. Find the quantity of "Biscuits" using INDEX + MATCH.

Task 6. Find the total quantity of Stationery products.

Task 7. Count how many products cost more than ₹20.

Task 8. Create a new column Stock Level:
Quantity ≥ 10 → "High"
Quantity ≥ 5 → "Medium"
Quantity < 5 → "Low"
Use nested IF.

Task 9. Do the same using IFS.

Task 10. Build a Pivot Table showing:
Rows: Category
Values: Sum of Quantity
Filter: Only categories where Sum of Quantity > 20 (using Value Filter)
