Order_ID	Product	Category	Quantity	Price	Customer	Order Size	Revenue
1001	Pen	Stationery	5	10	Modassir	Medium	50
1002	Notebook	Stationery	12	50	Rahul	Large	600
1003	Coke	Beverage	3	20	Ayan	Small	60
1004	Chips	Snacks	2	30	Sana	Small	60
1005	Water	Beverage	8	15	Imran	Medium	120
1006	Chocolate	Snacks	6	45	Modassir	Medium	270
1007	Marker	Stationery	15	25	Rahul	Large	375
1008	Juice	Beverage	4	35	Ayan	Small	140
1009	Biscuits	Snacks	10	12	Sana	Large	120
1010	Eraser	Stationery	20	5	Imran	Large	100

🎯 PART 1: XLOOKUP (2 Tasks)

Task 1. Find the price of "Chocolate".
Task 2. Find which product has Order_ID 1005.

XLOOKUP
45
Water

🎯 PART 2: INDEX + MATCH (2 Tasks)

Task 3. Find the category of "Chips" using INDEX+MATCH.
Task 4. Find the customer who ordered "Marker".

INDEX + MATCH
Snacks
Rahul

🎯 PART 3: SUMIFS / COUNTIFS (2 Tasks)

Task 5. Find the total quantity of Stationery products.
Task 6. Count how many orders are from Modassir.

SUMIFS/COUNTIFS
52
2

🎯 PART 4: Nested IF / IFS (2 Tasks)

Task 7. Create a new column Order Size:

Quantity ≥ 10 → "Large"
Quantity ≥ 5 → "Medium"
Quantity < 5 → "Small"
Use nested IF.

Task 8. Do the same using IFS.

Nested IF / IFS
Medium
Medium

🎯 PART 5: Pivot Table (2 Tasks)

Task 9. Build a Pivot Table showing:
Rows: Customer
Values: Sum of Quantity, Sum of Price
Add a Calculated Field called Revenue = Quantity × Price
Sort by Revenue descending

Task 10. Add a slicer for Category. Test it.

Customer	Sum of Quantity	Sum of Price	Sum of Revenue
Rahul	27	75	975
Modassir	11	55	320
Imran	28	20	220
Ayan	7	55	200
Sana	12	42	180
Grand Total	**85**	**247**	**1895**
